

MANIFEST

Originarios.org is an organization created as a means of awareness of families and communities and their merger, putting aside individualism, to bridge the gap between needs and possibilities of the unfavored, basing on progress and modernity scope, developing means in education, health, arts, culture areas and economic sustainability with women, maternity and childhood as main characters and fomenting work, source of individual and social progress.

Our primordial aim is to promote social welfare to assure intellectual and cultural development as well as physical welfare to guarantee attainability and lead a way to prosperity and public interest, according to the Constitution of the Argentine Nation in general and children's rights in particular as Nation's support.

Originarios.org offers a jointly research of structural projects and approaches for citizens who live at the frontier, in absolute poverty and fragility, delimited by cultural barriers, out of the social economic system, and who are deprived of the opportunity to develop in contrast with favored classes.

When we talk about frontiers we are not only referring to geographical boundaries but also to nearby *symbolic and socioeconomic barriers*.

Our founding and basic goal for social development is to search for an implementation of knowledge, methods and technologies.

Access to clean water leads to basic hygiene and health conditions, as water is not only taken as a merger topic but also as the search of common work and prosperity, i.e., a basic resource of progress used for agriculture and, consequently, the fruit of labor.

Originarios.org also aims for an ecologically sustainable economic development to promote responsible care of *our house*, the planet we live in. Great global leaders' vision is clear, "...we shall be aware of the Earth preceding us, Earth that has been donated. We cannot think of it as an utilitarian resource of efficiency and productivity for individual benefits only anymore...".

We shall change our life style which is based on an economic and social system depending on such a false premise of unlimited resources.

We believe that fair opportunities in matters of basic infrastructure lead to an opportunity to generate tools as to own a decent life to align individual and social developments, i.e., the support needed for a multicultural, fair and free inclusive nation that does not necessarily dominate social and cultural excluded minorities, but create a space for voice, reflection, inclusion, development, peace and prosperity.

Originarios.org is looking forward to promoting sources of sustainable and virtuous work to train people and help them in their social insertion and personal development.

Originarios.org expects that aspects related to natives' culture, who sometimes are deprived of their sociocultural exchange in major cities be efficiently directed through channels and spaces of modernity to align people who have acquired a cultural identity naturally linked to their history, language, art, but has also been restricted due to physical distance or lack of contact with people who do not belong to those territories, all of this, assuring continuity and proliferation of practice, rhythm and style, i.e., national cultural heritage and wealth.

Originarios.org calls for awareness, an approach to those we are related to, for being natives and humans as well, but in need. This is our message: help us to help.

Each one of us has the possibility to be part of the positive change that humankind needs. All together we must ensure justice, guarantee freedom benefits and collaborate with general welfare. This is the call we are making and this is the need we still have. need.

We want and propose to work based on intercultural dialogue, where we unite different voices, experience and points of view of the different towns we work with.

It will be easier to find the answers to the historical problems which affect these communities in the multicultural richness that we obtain

We believe this is the way to collaborate and strengthen the social fabric of the communities we work with, and in this way, the organizations will be able to regain their vitality to start over the productive and cultural work in a collective and integrated way.

It is up to us, and change relies within ourselves; the effort we make today has the Providence for the future generations.

All of us who make Fundación Originarios!
